

To all our Clients & Support Partners,

It is with great excitement that I can announce the Merger of Teck Global Pty Ltd and Surge Engineering.

Over the last few years Surge and Teck Global respectively, have managed to service and support their clients to the highest standards and have grown from strength to strength, always with their eyes on the future.

We take this opportunity to acknowledge the efforts by all that have made this a reality and we thank our valued clients and support partners that have supported our businesses throughout the years.

Teck Global and Surge have always had a very close working relationship and it was a natural choice for us to merge our strengths together, with our combined strength we can service and support our current and future clients more effectively, more efficiently and provide even greater support moving into the future.

Over the next few weeks, the merger will commence slowly and gather momentum toward the financial year end 2022, but rest assured that we will support our client' projects and continue to do so into the future with no disruption to current agreements and schedules, as we honour our commitments.

We ask for your continued support as we move through this transition period and work towards and even better future for all of us at Teck Global Group and you, our valued support partners, and clients.

Thank you for being a part of our journey so far.

Best Regards,

Pieter Erasmus
